

Product information:

The CP43ARJ allows you to attach one APM paging console on the front, while the phoenix connector on the back lets you route the signal to a next paging console or junction box. It can offer 20V power to the APM console and is also equipped with 2 jumpers to terminate the audio -or databus. The CP43ARJ wall junction box is fully compatible with bTicino installation materials.

Variants:

- CP43ARJ/B - Black version
- CP43ARJ/W - White version
