DSC35

Connection cable with dual steel core, snap hook & open ends - 3.5 meter

Product information:

A connection cable with conductors and a steel suspension and safety wire in a single outer jacket. This offers the cleanest and most elegant solution for connecting and mounting the loudspeaker. This professional connection cable with two integrated steel cores for suspending adds an additional drop safety for the loudspeaker. Fixation is made through two snap-hooks on one end and a dual Gripple™ fixation on the other end. The cable length of 3.5 meters offers possibilities for a wide variety of ceiling heights. An innovatively designed rear cover of the ALTI pendant loudspeakers (not suited for ALTIxM series) can be placed after installation and hides the connection and suspension on the speaker end. The ceiling end connections are covered through a cable cover.

Variants:

- DSC35/B - Black
- DSC35/W - White version
