Highlights:

- Ultraflex™ Ultra flexible jacket
- Oxygen free copper
- 60 mm transparent shrink sleeve
- Black sleeve to prevent separation (removable)
- Gold contacts, scratch resistant black shell
- Zinc diecast shell (Black Cr plated)

Product information:

These PROCAB prime series cables are designed for high demanding professional applications where High connectivity and durability are desired, so that even after years of use in the hardest environments these cables will still excel in their reliability.

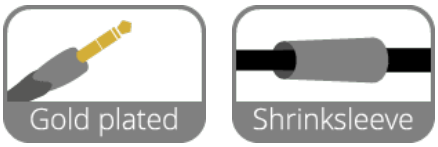

The PRA631 is composed using PSG124 UltraFlex™ cabling which ensures to remain straight and flat no matter how it's treated, making it ideal for on stage use. The PVC outer jacket provides a flexible but solid feel while making it able to withstand an extreme amount of bending cycles.

The Male PROCAB PRIME RCA (PCR2M) connector ensures high connectivity thanks to its durable gold contacts. This, in combination with its scratch resistant black shell makes this connector excellent for high demanding professional use. Both connectors are provided with a red or white colored ring to easily define the audio channel.

The Neutrik 6.3mm mono jack is a heavy duty professional 2 pole 6.3mm jack with durable gold contacts intended for users requiring dependable and lasting connections for years to come. The precisely machined one-piece tip contact avoids hook up in a socket or break of the tip.

Certification:

Properties:

Components:

- Connector: PCR2M - Cable connector - professional RCA/Cinch male - gold contacts - pair
- Connector: NP2X - 2 pole 1/4 inch professional phone plug
